Acquiring information alone isn't Education, yet it is that what improves us people thus decides the fate of the country. Education should assist one with procuring fundamental abilities, there by live well, act well to other people and contribute his/her best to the general public/country/world. Eventually the point of Education ought to be the genuine harmony on the planet, where people just use, create and spread the up-sides in them.

Father of our country, Mahatma Gandhi has flawlessly noticed the significance of Education as 'the overall coaxing out of the most incredible in kid and man, in body, psyche and soul'. Here in this College, we are in that work to draw out the most incredible in our understudy instructors, in all viewpoints, so they are prepared to do a similar when they become the genuine educators later. Every one of the exercises are coordinated here as a cooperation by the workforce to accomplish this shared objective. Along these lines Sakthi Institute of Teacher Education and Research in scaling new statures in scholarly greatness and social responsibility.
